Office Action Summary	Application No. 10/501,894	Applicant(s) BRUNBAUER ET AL.	
	Examiner Mark Halpern	Art Unit 1731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

- 1) The content of the Specification is not complete, for example, the Specification does not include a Brief Description of Drawings.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2) Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the temperature" in line 1. There is insufficient antecedent basis for this limitation in the claim. Also it is not clear what temperature is referenced.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1731

3) Claims 1-4, 6, 12, are rejected under 35 U.S.C. 102(b) as being anticipated by Ishino (5,849,153).

Claims 1-4: Ishino discloses the formation of a paper sheet and the printing of a coating layer made of water soluble polymer solution (Abstract). The polymer includes polysaccharides (col. 9, lines 1-37). The printing is done at 90 degrees C (Example 1). The printing is done before the paper is put away for storage.

Claim 6: paper basis weight is 15-80 g/m² (col. 7, lines 50-55).

Claim 12: the paper is a cigarette paper (Example 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4) Claims 5, 7, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishino. It would have been obvious to one skilled in the art at the time the invention was made, that the printing solution viscosity and the paper absorption be optimized to obtain desired product results.

5) Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishino in view of Kraker (6,779,530).

Claim 8: Ishino discloses that the printing is done prior to completion of the process. Kraker discloses the roll up of the completed paper (Kraker, Figure 3). It

would have been obvious to one skilled in the art at the time the invention was made to combine the teachings of Ishino and Kraker, because such a combination would provide for storing the paper product prior to making cigarettes.

Claim 9: Roller backing is disclosed in Figure 3 of Kraker.

Claim 10: entire width of paper is coated.

Claim 11: reduced ignition proclivity is disclosed (Kraker, Title)

Conclusion

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
